\$2.00 A YEAR IN ADVANCE

U.F.A. CANDIDATE SPEAKS IN CARBON

E. J. Garland, U.F.A. candidate for the Bow River Constituency in the Federal elections, addressed a meeting in the Elks' Hall, Carbon, on Thursday night last. Mr. Garland's address was not based along party lines. He practically admits that there is no hope of the Progressive organization having the largest group in the next parliament, but he believes that as a member not tied to any one governing party, that he is able with the loyal support of other members of his rank, to do more good for the country in an advisory capacity, than he could were he the leader of the largest group in the house. Many of Mr. Garland's measures that were put forward during his term of office have become law during the last and intermediate sessions, testifying to the good work that this member is doing for the constituency and the country as a whole.

Mr. Garland's main topics in his address were the tariff, the restoration of the natural resources to the different provinces, old age pensions, re-valuation of soldier's settlement lands, the Beauharnois Power scheme, the Banking Act, Unemployment, etc.

With regards to unemployment, in which we are all interested in, Mr. Garland explained that although Mr. Bennett promised to call parliament immediately after the election and to settle this question, that this was only a party promise, and that although parliament may be called, the question cannot be settled in a few sittings. England has had this problem for fifty years and men who have devoted their lives to the study of unemployment conditions have not come to a solution. How, then, can Mr. Bennett clear up the question in a couple of months at least? According to Mr. Garland the unemployment question is a serious one, but it can only be changed in a period of time and it will not be for a couple of years at the earliest. It will have to right itself through economic conditions, with the help of increased trade with other nations, and many other things.

Mr. Garland concluded his address by reminding the voters that they must use the X mark when voting in the Federal election and only place this mark after the candidate for whom he wished to be elected. If the numerical system is used and a voter marks a 1, 2 or 3 after the names on the ballot paper, that ballot will be spoiled.

Mr. Garland was given a most attentive hearing and his remarks were straight to the point on all questions.

The Misses Vera Foxon, Clarelle Ramsay and Audrey Evans left yesterday to spend ten days at the C.G.I.T. camp at Sylvan lake.

OLIPHANT-KENNY

A quiet wedding was solemnized in Calgary on Saturday, July 12, when Margaret Kenny of Calgary became the bride of Mr. George Oliphant, eldest son of Mr. and Mrs. J. H. Oliphant of Carbon.

Following the ceremony the happy young couple left by car on a trip to Banff and other points in the mountains and on returning will make their home in Carbon.

The Cemetery Improvement Committee ask all those interested in the upkeep and beautifying of the cemetery, to be on hand Thursday, July 24, to help with gravelling the roadway across cemetery, and other general work.

Mr. and Mrs. Graham and family, and Miss Myrtle Skerry were visitors to Calgary on Saturday, and attended the Orangemen's picnic.

Miss Helen Smith left Monday for a couple of weeks holiday at Bassano.

WM. MCKENZIE IS ROBBERY VICTIM

Mr. Wm. McKenzie, a well-known farmer to the north of Carbon, was held up at the point of a gun on Wednesday morning last, and two youthful bandits escaped with his car and money.

McKenzie was on his way home from Calgary when two young men stopped him and wanted a ride to Didsbury. So he took them. When he arrived at Didsbury the two youths inquired where McKenzie was going and when he said to Three Hills, they decided to go with him.

About twelve miles from Didsbury McKenzie found himself covered with a revolver and was told to stop at a nearby school house. Here the youths relieved him of his money and tied him up in the school house, where he was left to die or get away as best he could.

After an hour's struggle McKenzie managed to free himself and immediately informed the Alberta Provincial police of the incident and the case is being investigated.

The robbers got away with both car and money, but the former was located that night near Crossfield.

A description of the two men was broadcast to all police officers of the province. The description of the men follows:

One is about 5 ft. 6 ins. in height; age 38, weight 140 lbs. and of dark complexion, wearing a grey suit and a cowboy hat. The other is 5 ft. 6 ins. in height, thin faced, dark complexion, wearing a dark sweater and cap. After the robbery they were headed east driving the stolen car.

DR. DAWSON GRAHAM

Conservative Candidate who will oppose E. J. Garland in the Bow River Constituency at the Federal elections on July 28th.

LETTERS TO THE EDITOR

Editor, The Carbon Chronicle

Dear Sir:

After hearing Mr. Garland the other night we felt there were a few things that should be said.

We people of Bow River are proud to have such a man as Mr. Garland to represent us at Ottawa. A man who through native ability and industry has become one of the outstanding men of Canada.

That other people appreciate him, we know. The United Church of Canada invited him to give two lectures before their Council in Toronto.

He is booked for two lectures at the School of Religion of the United Church, meeting in Edmonton in August.

The Associated Boards of Trade, when looking for a man to visit the oppressed fishermen of Nova Scotia to give them help and encouragement, selected Mr. Garland for his well-known sympathy and willingness to help the unfortunate.

Mr. Garland's industry is remarkable. During the last session of the house he rose to address his fellow members on one hundred occasions. To prepare facts and figures to enable him to do this meant some amount of work.

The Toronto Star, weekly, in one of its issues said: "Speaking on the Drumheller coal situation, Mr. Garland said the Dominion Railway Board made mathematical mistakes. He is prepared to prove that to the House of Commons, and anyone who knows Mr. Garland's persistent and aggressive temperament when aroused, will not doubt that he will make the House believe."

Another paper, "The Mail," said of

GRAND FORKS NEWS

The Grand Forks Athletic Club held their regular afternoon sports on Tuesday, on their grounds at the Three Hill Creek, and the following games were played with the Swallow team.

Two baseball matches which were won by the home team 10-4 and 6-1. A men's soft ball match which the Swallow team won 28-20.

The number of people at the grounds on Sunday was the largest this year, there being about 200 present, while the number of cars counted were 56. Mr. Costella was very busy on the water wagon, it being a very hot day, and his ability as a dispenser of cold drinks was greatly appreciated by the players and spectators.

Owing to a misunderstanding on the part of the G.F.A.C. secretary the score of the soft ball game at Swallow between the ladies' teams, was reported wrong. It should have been 45-49 in favor of Swallow.

HESKETH DEFEATS CARBON AT TENNIS

The Carbon and Hesketh Lawn Tennis Clubs played an interesting match on the Hesketh courts on Wednesday July 9th. The result was a win for Hesketh by four events to two. The seventh event resulting in a draw. This was the first Men's singles, in which V. Hawkins of Carbon and L. Brown of Hesketh won a set each and owing to the lateness of the hour it was impossible to play the deciding set.

The following are the results and scores

Men's Singles—V. Hawkins of Carbon drew with L. Brown of Hesketh, 6-3; 4-6.

N. McClure of Carbon defeated G. Price of Hesketh 6-3; 6-2.

Men's Doubles—L. Brown and Tom Heath of Hesketh defeated V. Hawkins and W. Edwards of Carbon 6-3; 5-6; 6-2.

R.C. Reid and J. Ridgewell of Hesketh defeated N. McClure and James Gilbert of Carbon, 6-4; 5-6; 6-3.

Ladies' Singles—Mrs. Hunter of Hesketh defeated Mrs. Willson of Carbon 6-1; 6-0.

Ladies' Doubles—Mrs. Brown and Mrs. Chapman of Hesketh defeated Mrs. Willson and Miss D. Nash, Carbon, 6-3; 6-5.

Mixed Doubles—C. H. Nash and Miss Nash of Carbon defeated T. Heath and Mrs. Brown of Hesketh, 5-6; 6-5; 6-2.

After the match the Hesketh club entertained the visitors to a picnic in the park at Hesketh and a very pleasant time was spent by all.

Mr. Garland is the recognized leader of the Progressive wing in the Commons since Mr. Forke succumbed to the temptations of a portfolio. He is the dominant figure in the picturesque 'Ginger Group' and he is well equipped to discuss western problems and conditions.

One does not need to agree in all things with the member from Bow River to recognize his ability. Members of the House and Press Gallery come in out of the lobbies when "Garland is up." He is one of the best speakers in the House.

Mr. Garland told us of many advantages of having an alert and progressive group at Ottawa.

I might mention one great piece of work for the West. It is conceded that the Crow's Nest Pass Agreement would never have been restored to the West but for the efforts of the "Ginger Group." The restoring of this agree-

LITTLE ITEMS OF LOCAL INTEREST

I. Gittman left on Sunday for a week's holiday at Banff.

Miss Milne from the Department of health, will give a demonstration on Foods and Food Values, specializing on Salads, on July 22nd. All ladies of Carbon and district are invited to attend.

FOR SALE—Broilers, 3 to 5 pounds, 25c dressed. 18c live. H. Braden.

Mr. and Mrs. R. J. Fairbairn and family left last week to spend a holiday at Banff.

Miss Belle Smith left Sunday on her holidays, which will be spent at Calgary and Banff.

The hottest day of the season was on Monday, when the temperature rose to 100 degrees in the shade.

True Olive was a Carbon visitor on Saturday.

E. J. Garland will speak over the radio on the evening of Wednesday, July 23rd.

A surprise party was held at the home of Mr. and Mrs. John Wolfe on Friday night in honor of Mr. and Mrs. Ed. Neher and family who left Monday for North Dakota after spending a couple of months visiting relatives and friends in the district.

Rev. and Mrs. A. Itterman left last Monday for a couple of weeks holiday in Winnipeg.

Mrs. Ramsay Nash and children returned from England on Saturday. They have again taken up residence in their house, which has been occupied by Rev. and Mrs. A. Itterman.

MEXICAN STAR CARRIES THE AUDIENCE IN LOVE-THRILLER

Harvey Ferguson's novel "Wolf Song," a romantic tale of pioneer days in the frontier of the old south-west in the 1840's, and which has been adapted to the screen, comes to the Carbon Theatre on Friday and Saturday of this week.

Gary comes to the mountain region of the old Southwest with other trappers and after two hard years in the towering wilderness of the Sierras, takes a holiday in the sleepy Mexican town of Taos. There he meets the fascinating little spit-fire, Lupe, who wins his heart with her lovely singing and marvelous dancing. They are married, but not until Wolheim has loomed as a desperate rival for his favor.

After the wedding Gary gets the old longing for the mountains and leaves his young bride for the mountain country. After that there are numerous thrills as he relents and tries to make his way back to her, through the perils of the wilderness and the roving bands of hostile Indians. The ending is a happy one.

There is no dull moment in "Wolf Song." It will hold you enraptured until the very end.

ment means that an extra 4 1/2 cents goes into the pockets of the farmers for every bushel sold. That alone means an additional \$25,000,000 for the business men of the west to handle.

We cannot afford to chance a new member for Bow River at Ottawa.

L. B. HART

"Duchess" Salutes Bridge

There was a happy incident at the opening of the \$20,000,000 Montreal Harbor Bridge on Victoria Day when the Canadian Pacific liner "Duchess of Richmond," 20,000-ton giant under the command of Captain A. Freer, R.N.R., added the salute of its deep siren to the cheers of the thousands assembled. Just as Premier Mackenzie King was formally opening the bridge, the liner passed dramatically

beneath it with multi-colored flags fluttering from bow to stern and her ensign dipping in the salute. Then she hailed the bridge with the stentorian "long, two short and long" blasts that herald arrival of Canadian Pacific ships. It is interesting to note that what is seen of the bridge contains the same weight of steel—20,000 tons—as there is in the ship.

Beneath the spreading chestnut tree is the Village smithy stand. For now he's selling hot dogs, With flies, and skitters and sand.

VACATION NEEDS

Have you Bathing Caps, Kodaks and Films, Cathartics, First Aid Kit, Foot Powder, Mosquito Cream, Razor Blades, Shaving Cream, Smoked Glasses, Stationery, Thermos Bottles, Talcum Powder, Compacts, Tooth Paste, Playing Cards, etc?

WORLD HAPPENINGS
BRIEFLY TOLD

Five thousand members of the American Legion and lady members of the Legion auxiliary are to visit Winnipeg for two days in August.

A British Empire Trade Exhibition, the first of its kind to be held in any country outside the empire, is to be held in Buenos Aires from March 14 to April 27, 1931.

A new India House was opened in London by King George with an expression of hope for the emergence of India from her present troublous era into days of peace and contentment.

Official figures on unemployment, showed 1,815,300 out of work in Britain on June 23. This was about 70,000 less than on June 16, but 697,493 above the same date a year ago.

Sir Joseph Ward, former premier of New Zealand, who resigned a few weeks ago owing to ill health, is dead. Sir Joseph, who was known as "the grand old man" of New Zealand, was 74 years of age.

Ralph Collins, Edmonton, Alberta, has been awarded second prize in an oratorical contest at the convention of the Optimist International, in Erie, Pa. Seven boys from clubs in the United States and Canada, competed. David Wolf, Washington, D.C., was first.

Marriages at famous Gretna Green, the elopers' haven in Scotland, are to be made extinct by legislation. The Government plans to pass by next fall a measure which will make legal only marriages which have been performed by a clergyman or a registrar.

The Quai D'Orsay has submitted the name of Arsen Henry, who is French minister to Siam, to the Canadian Government for approval as the next French minister to Canada. Hon. Jean Knight, the first holder of this post, is returning to France to become head of the French Government Press Bureau.

UNCOOKED SALAD DRESSING

Warm weather and plenty of vegetables combine to make the tempting salad a frequent dish on the menu. The secret of a delightful salad is the dressing and here is the recipe for an uncooked salad dressing that will be relished by every member of the family — and it can be made up quickly, and, once made, it will keep for weeks:

- 2 eggs.
- 1 teaspoonful salt.
- 1 teaspoonful mustard.
- 1 cup vinegar.
- 1 can Eagle Brand Milk.

Beat vigorously all ingredients except vinegar, for a few minutes. Add vinegar, stir well and set aside for a few hours to thicken.

Plans To Visit the Moon

Scientist Has Perfected Model Of a Rocket That Will Make Trip

At Horst, a little bathing place on the Baltic, Professor Oberth has been very busy of late perfecting an exact model of the rocket in which he intends visiting the moon. This model rocket is to be shot up by the explosion of the gas it contains and instruments concealed in it will record the composition of the atmosphere through which it travels. An automatic parachute will bring the rocket down again when the motors are exhausted. The rocket-model is expected to reach a height of 100 kilometers and to bring back valuable secrets.

Doctor: "you say you have been drinking six glasses of beer a day? I can only allow you half that number."

Patient (after a pause): "I really believe I used to drink a couple more."—Mummel, Hamburg.

3444

IT'S SMART AND WEARABLE

A sportive frock of yellow and white printed linen boasts of its plaited skirt treatment.

It has the smartly belted waistline like the grown-ups are wearing, that achieves a pinched-in effect.

A large yellow bone button attracts attention to the tab closing of bodice with interesting cap sleeves.

The back is quite straight and slender.

Style No. 3444 is simplicity itself to make. It can be had in sizes 6, 8, 10, 12 and 14 years. For the miss of 8 years, 1 1/4 yards of 39-inch material with 1/4 yard of 39-inch contrasting is sufficient to copy it exactly.

The two-piece skirt is merely pressed into box-pleat effect and attached to the bodice. Patch pockets stitched at edge of plaits, secure a snug hipline, to keep its line slender.

It's so attractive in white cotton broadcloth printed in sailor blue polka-dots with cap sleeves, belt and pockets of plain blue.

Shantung is stunning in opal-pink shade.

Tub silks in baby blue or baby pink tones is just the cutest idea ever that promises to be very popular this summer for beach and country wear.

Nile green and white pique print worn with green leather belt is smart.

Yellow-beige and brown stripe in men's cotton shirting fabric is very effective with the cap sleeves and pockets cut on the bias and worn with brown leather belt.

Printed dimity, printed handkerchief lawn and gingham checks also appropriate.

Price 25 cents in stamps or coin (coin preferred).

English Students For Canada

Hamilton Fyfe, the new head master of Queen's University, Kingston, stated recently that a movement was reaching fruition by which English public school boys will go to Canadian universities in the same manner as Americans and South Africans are Rhodes scholars at Oxford.

Although we may be inconstant in many things, we stand loyally by our prejudices.

Takes First Glider Lesson

Prince Of Wales Coached By Famous German Pilot

The Prince of Wales has taken his first glider lesson.

The lesson was given near Lewes, Sussex, by Robert Kronfeld, a German, who is reputed to be the world's champion glider pilot. It consisted chiefly of a demonstration as how to operate the glider, and it was understood the prince did not actually pilot the ship.

The prince long has been an enthusiastic aviator and is reputed to be an excellent pilot, although for reasons of state he is never permitted to make solo flights. He always is accompanied on his flights by one of the best Royal Air Force pilots, but the prince handles the controls except when taking off or landing on strange or difficult landing fields.

Montreal Has Grown Rapidly

Is Now Fifth Largest City On the Continent

Few cities in Canada have shown such substantial growth as Montreal. Within a decade the total assessable property has doubled in value and is now \$1,200,000,000. In 1914 the population was 625,000; today there are a million people in the city proper. In 1914 there were 153 miles of streets and today there are 600 miles. The municipal revenue, which in 1914 was \$10,500,000, is now \$36,750,000. Montreal has reached the rank of the fifth largest city on the continent.

Kept Appointment

Four Men Keep Tryst Started 31 Years Ago

Keeping a tryst started 31 years ago, four men met in Trafalgar Square, London, England, on a recent night. In 1899 six young decorative artists, H. E. Hansfield, G. MacDonald, G. Clifton, E. Bile, Brown and Edwards, were notified that the studio in which they worked was to be razed. They then made a vow to meet once a year. This year only Mansfield, MacDonald, Chilton and Bile were able to attend, but the two absent ones sent telegraphic greetings to their friends.

Agricultural Conventions

Efforts will be made to bring as many large agricultural conventions as possible to the west at the time of the World's Grain Exhibition and Conference, in Regina, in 1932. According to a decision at a committee session, such conventions will be invited to meet directly prior to or following the show, in cities other than Regina. Delegates will thus be able to attend Regina session.

SUNDAY SCHOOL LESSON

JULY 20

MOSES "A COURAGEOUS LEADER"

Golden Text: "By faith he forsook Egypt, not fearing the wrath of the king; for he endured, as seeing Him who is invisible."—Hebrews 11:27.

Lesson: Exodus 1:8-14; 2:1-22; 3:1-14; 11:1-10; 32:30-35; Deuteronomy 34:1-8; Hebrews 11:23-29.

Devotional Reading: Psalm 90:12-17.

Explanations and Comments

The Call Of Moses, verses 1-10. — The summons to become the leader of his people, deliver them from oppression in Egypt and bring them forth on their way to the Promised Land, came to Moses as, in his care of the flock of his father-in-law, Jethro, the priest of Midian, he wandered from the back of the wilderness (that is, the west; the east is always the front), to Horeb, the mountain of God. There before the bush that burned and yet was not consumed, Moses heard God speaking to him. Just as the account of the temptation of Christ in the wilderness must have come from Christ Himself, and is his pictorial way of portraying His inner experience, so the account of the call of Moses in the wilderness must have been told by Moses himself, and may have been given by him in this pictorial way. The burning bush may have been an outward representation of an inward experience—the flame of enthusiasm for a great cause. Be that as it may, it is assuredly true that Moses had the power to see the divine origin of the glowing beauty of the bush; he was able to see God in the things of everyday life.

"Moses stood before an ordinary bush, and he became aware of God; Jeremiah stood before a budding almond tree while all around was dead, and he became aware of God; Wordsworth stood before a little primrose on a rock, and it became to him, the court of the Deity."—J. H. Jowett.

"Draw not high hither; put off thy shoes (sandals) from off thy feet, for the place whereon thou standest is holy ground." Recall Jacob's sense of God's presence at Bethel and the holiness of the place.

"Earth's crowned with heaven, and every common bush afire with God;

But only he who sees, takes off his shoes; The rest sit round it and pluck blackberries." Mrs. Browning.

With a new flash of insight Moses knew that God was calling him to a stupendous task, that it was God's will that he should return to Egypt and accomplish the deliverance of the enslaved Israelites. All this is expressed in the words of verses 7-9.

Building Permits

Building permits issued by 61 cities in Canada during May of this year were valued at \$19,621,302. For the first five months of 1930 the total value of building permits issued by these cities had a value of \$65,267,996.

Reciprocal Trade

British Bankers In Favor Of Free Trade Within the Empire

Reciprocal trade agreements between the nations comprising the British Empire and the retention of an open market for Empire products was urged in a resolution adopted recently by representatives of several leading British banks meeting in the offices of Hambro's Bank, London, England. The meeting was presided over by Sir Eric Hambro.

"Urgent measures for the promotion of inter-Imperial trade are needed to secure and extend the market for British products, both at home and through export trade," the resolution read. "Bitter experience has taught Britain, that hopes expressed four years ago in the plea for removal of restrictions upon European trade have failed. Restrictions have been materially increased and the sale of surplus foreign products in British markets has steadily grown. While we retain hope for the ultimate extension of free trade worldwide, we believe the immediate step for securing and extending the market for British goods lies in reciprocal trade agreements between the nations of the British Empire. As a condition of securing these agreements Britain must retain an open market for all Empire products while being prepared to impose duties on all imports from other countries."

London Traffic Project

Scheme To Construct Underground Lines For Transportation Of Goods

A scheme is on hand to make possible the removal of goods traffic from London streets. It consists of the construction of underground lines, with fifty-four stations, for the sole purpose of carrying goods. The promoters are anxious to build seventy-five miles of tubes at a cost of about \$200,000,000. All the principal railway termini and goods yards would be connected; the docks, wharves, and public stores would have their private stations. It is said that 125,000,000 tons of goods are carried annually in London, and the trade of the Port of London amounts to \$144,000,000 a year. According to the promoters of the new scheme the cost of existing congestion in the streets is \$120,000,000 per annum, while the railways have estimated at \$300,000 a year the amount of money they lose by the detention of goods lorries at Billingsgate Market alone.

CHAPTER XX.—Continued.

"Since the hair itself appears to have been dipped in star dust," was the gallant response, "their absence is not noticeable."

"You are a base flatterer," declared Charmian, and turned away, thereby transforming what had been "the gold bar of heaven" into a plain New England window sill!

But the doctor liked his fancy, and Grandma, who had become accustomed to the appellation, merely smiled. Then her face sobered, and she replied: "You've noticed it, too, sonny?"

He nodded, saying thoughtfully: "Something's gone out of her. For lack of a better word we'll call it pep. She seems on edge. Last night I ventured to ask if she didn't feel well, and—she took my head off!"

He grinned at the memory, while Grandma chuckled as she admitted: "Sometimes she gets that way. Charmian's a good girl, but she's no saint, and I'm glad of it. She's human like all the Davises. I'll tell you what's the matter, Doctor, but you mustn't ever let on I spoke of it. It's Jimmy Bennett."

John Carter didn't suspect that Grandma's wise old eyes were watching to see how this would strike him. His head lifted suddenly, as if her words surprised him, and he echoed: "Bennett! You mean she . . ."

"I don't mean anything of the sort," she interrupted. "All I mean is that before Jim went away Charmian did something that hurt his feelings. She misjudged him; and when she found out her mistake she felt just terribly. So she wrote him a letter. I don't know what she said, but it took two stamps so she must have said considerable. That was all of a month ago, and he's never answered. For two weeks she hasn't mentioned a word about it; but you can depend upon it, that's just what's ailing her now."

John Carter looked thoughtfully into space until Grandma gently reminded him that his lunch was getting cold. He seemed to pull himself back from somewhere at her words, and said: "Letters sometimes go astray, Grandma. Didn't she hear from him at Christmas?"

"Only a card. Not—not what you'd call a real affectionate card, either."

Summer Strains

For all the strains the flesh is heir to during the summer months—use Minard's. Popular for fifty years.

W. N. U. 1846

The doctor laughed, though his eyes still looked troubled.

"I bet there's some explanation," he insisted as he resumed his meal. "I don't think Bennett liked me particularly; but it struck me that he'd be a darned nice chap if only he'd knock the chip off his shoulder."

"Jimmy's the salt of the earth," said Grandma loyally.

"And he's in love with Charmian," added the doctor.

"Always has been," said the old lady, "and in my opinion the only reason she's not in love with him is because he's always been too close. She's never had a chance to get—well, a sort of bird's-eye view of him, so to speak, and see what a splendid boy he is. She's used to him, same as she's used to the kitchen range and the front door; and I'll say for Jim that he's been every bit as useful to her as they have! I miss him like anything."

"From all appearances I should say that your granddaughter misses him, too," ventured John Carter, as he took Grandma's empty plate and proceeded to bring the desert that Charmian had prepared. "Are you sure the letter was addressed properly?"

"That's my one hope," said Grandma, brightening. "Lizzie Baker was in yesterday and said she had a card from Sarah Bennett a week ago, and they were off somewhere on a trip, all three of 'em. I told Charmian, and seemed to me she was more cheerful for a while. This is a good pie, isn't it? Charmian got up early and made it before breakfast."

"She's no business to do such things!" declared John Carter. "She needs more sleep. Look here, Grandma, does it make things harder for her—my being here?"

"My stars, no! Maybe she gets a little more food ready for noontime; but it's an awful comfort having you look after the furnace, sonny, to say nothing of the times you drop in to speak to me. Charmian said just yesterday that she didn't see how she could keep the school without you being here. Don't you get fretting over that. Take another piece of pie, Doctor. It'll please Charmian to think you liked it. She's a real good cook, isn't she? She says if the school board turns her down next year she'll get a job at the hotel!"

"When she does," retorted the doctor, helping himself to a second generous slice, "I'll take my meals there!"

"You needn't bother to wash the dishes," said Grandma, when, their luncheon over, the young man started to clear the table. "Some way it never seemed right to me for you to pay for a meal and then clear up afterward. You leave 'em be."

The doctor threw her a smile, but continued at his task nevertheless, explaining as he filled the dish pan with hot water: "You forget the reduced price at which I eat. It was in the contract that I clean up when I had time; and so far as I know a call to South Wickfield is the only prospect for this afternoon."

"Maybe if Ezra brings Jim's letter you could leave it at the school as you go by," suggested Grandma.

"Sure!" he replied with cheer. "I meant to time things so I could stop for Charmian on the way back. I think she's grown thin on the exercise she talks of needing—at least, she's looked so this last week. I'll run in from the office before I start, Grandma, and see if the letter's here."

"Thanks, sonny. Ezra comes early in the afternoons. It's real good of him to come at all. We aren't on his route, being right here in town this way. He says maybe it's against the law for an R.F.D. man to stop on Main Street, but if 'tis, he's not going to find out! He saves Charmian a walk to the post office every night, and we appreciate it. Just hang that dish towel behind the stove. It'll freeze stiff if you put it out today."

"Well," murmured the old lady to herself, when John Carter had escorted her back to her place by the window and gone out to his office, "I don't quite know what to make of that young man. He looked the least mite startled when I told him Jim Bennett was what was worrying Charmian; but after that one minute he was natural as life, and he didn't seem to mind when I asked him to carry her Jim's letter if it came today. I can't make out whether he's trying to act square to Jimmy, or—"

Grandma stopped abruptly, peering from the window, and then said: "Here comes Lizzie Baker. She's got on her ulster, and her old mink fur piece on top o' the lavender scarf

BOILS GO OVERNIGHT

"Many Boils on neck. Doctor said lance. Tried 'Booth-Salve' first; boils vanished overnight." C. T. Scott. "Booth-Salve" stops pain in 1 minute; boils go in few hours. At all druggists.

that Mrs. Merry knit her for a Christmas gift. I'm sick to death of that fur since the moths got into it and ate a piece out o' the back. I hoped she'd stop wearing it when Mrs. Merry gave her the scarf, but she'd as soon think of leaving it home after the first o' November, as she would of leaving her false teeth. She's coming in. Hello, Lizzie! What's up today?"

"I wish the mercury was up," replied Miss Lizzie, as she dropped the fur onto the table and began to unwind the scarf. "It's only six above zero, and what it'll be by sundown the Lord knows. I wanted to run in this morning, Grandma, but I didn't have a chance. Just as I put my bread in the oven Luella Moore Purdie come over and made me burn it. I clean forgot all about it, she talked so fast. She'd been having words with the deacon and wanted to let off steam. She never was one to keep her affairs private. Seems that Edgar wants to sell her house over to South Wickfield, and invest the money to better advantage; but Luella says she's going to keep it for a refuge."

"She may need a refuge before she gets through with Edgar Purdie," responded Grandma. "Sit down, Lizzie. Take off your coat or you'll never be able to squeeze into that rocker."

Miss Lizzie obeyed, remarking on how warm and comfortable the house was.

"You're lucky to have a man on the place, Grandma; not that I miss what I've never had, but the older I get the harder it is to keep real comfortable without help. Yes, Luella was het up. She'd read somewhere that city folks have what they call trial marriages—if they get sick o' their bargain they just split up. She told the deacon hers was that kind, and he called her a wanton! She said if ever such a word passed his lips again, she'd clear out."

"Do tell!" ejaculated Grandma. "It must have been a fight."

"I guess 'twas. No wonder I burned the bread, hearing her tell about it. Gam Garfield may have a law suit on his hands yet! Dear me suz! that's news enough for one day. Grandma, but it's not all. I had a letter from Sarah Bennett, and you'd never guess what she's up and done. She's bought a fruit farm out in California!"

"Good land!" cried Grandma. "Has she lost her mind, or is Jimmy going to run it for her, the farm, I mean? Jim couldn't run his mother's mind if he was to try till Gabriel blows his trumpet."

"It's more likely that she runs his," replied Miss Lizzie. "George K. told Jim that he could have his old place at the bank whenever he wanted it again; but it looks now like he'd never come back. I suppose they'll need him 'round the farm. You don't have to milk fruit trees, but I presume a man would come in handy just the same; and Sarah'd never let Jim come back to Wickfield without her, you can depend on that."

Miss Lizzie rocked violently for a minute, while Grandma appeared to be gazing into the street.

"Sarah Bennett's gone daft over

FROM MOTHER OF EIGHTEEN

Read How This Medicine Helps Her

Cardston, Alberta—"I am fifty-eight years old and the mother of eighteen living children. We live on a farm and I am a very healthy mother considering that I have such a big family to work for. The druggist first told me about Lydia E. Pinkham's Vegetable Compound and I have depended on it for many years. When I had this picture taken, the photographer was telling me about his wife's ailments and after I told him about the Vegetable Compound he went to the drug store and bought her two bottles."—Mrs. BERTHA SALLER-BACH, St. Cardston, Alberta.

California," continued the caller, having caught her breath. "She says she feels like a new woman; and that she's missed Sophie something dreadful all these years without half knowin' it. Seems that Sophie's wanted a fruit farm for years and years. She knows all about the business, and they've gone into a sort of partnership, Sarah providin' the money, I presume, and Sophie the brains. And here's the queerest thing yet, Grandma: She never said one word about Jim, or what's to be done with her fine house here in Wickfield! Don't that beat all?"

(To Be Continued.)

To Rival the Zeppelins

Germany Planning Giant Airplane To Challenge Dirigibles

An airplane company in Berlin plan to make a giant airplane of the "flying wing" type—that is, without a body, everything being carried inside the wings—as a challenge to dirigibles. It will carry 120 passengers, with a "pay load" of 21 tons, and will have a cruising range of 5,000 miles. It will have Diesel engines, burning crude oil.

The world will welcome a test of this kind. So far, the Zeppelins have had a monopoly among big craft carrying many passengers, and have been the only trustworthy trans-Atlantic flyers. They have the great advantage of being self-supporting in the air, whether their motors are going or not.

The airplane though, has its peculiar advantages, the chief of them being speed. The dirigible may be blown back, or out of its course, by a gale. A 'plane can drive through a gale.

Dirigibles find it hard to cross the North Atlantic because of prevailing head winds, although by turning toward the equator they can swim ahead in the trade winds, as Columbus did. 'Planes with enough motive power, and enough size for steadiness may solve the problem for direct routes between Europe and North America.

Nine Daily Foreign Papers in Canada

Chinese Have Four, Japs Two, Jews Two, and Finns One

There are nine daily newspapers in Canada, the Soo Star points out, which are not printed in either English or French. Victoria and Vancouver have one Chinese daily each, and Toronto has two; Vancouver has two Jap dailies; Winnipeg and Toronto have each a Jewish daily and Sudbury prints one in Finnish. There are in addition some 38 weekly papers not printed in either English or French. The claimed circulations of these run from 1,650 to 20,000. Winnipeg prints about half of them although Montreal, Toronto, Vancouver and Edmonton are well represented.

Miller's Worm Powders are sweet and palatable to children, who show no hesitancy in taking them. They will certainly bring worm troubles to an end. They are a strengthening and stimulating medicine, correcting the disorders of digestion that the worms cause and imparting a healthy tone to the system most beneficial to development.

Built To Fit

A boat much larger than the stream in which it floats is a very common sight in certain parts of China. Junks navigate with ease these ribbon-like interior canals. These boats, whose superstructure is strikingly large, often hang over the banks of the canals, through which they pass. The bottom of the craft is small enough to "fit into" the stream.

No child should be allowed to suffer an hour from worms when prompt relief can be got in a simple but strong remedy—Mother Graves' Worm Exterminator.

First Apples Exported

The first apples exported from Nova Scotia are said to have been shipped by sailing vessel from Halifax to Liverpool in 1849, the price realized being \$2 per barrel. In 1886 a shipment of 700 barrels was made by schooner to Boston, U.S.A., the price realized being \$2.5 per barrel.

Her Suiter: "Sir, may I have your daughter?"

Real Estate Man: "Yes, but you'll have to sign a two-year lease."

Little Helps For This Week

"And thine ears shall hear a word behind thee, saying, 'This is the way, walk ye in it.'"—Isaiah xxx. 21.

A Calm Path

Which lies before the feet through common ways,
And undistinguished crowds of tolling men,
And yet is hard to tread, though seeming smooth,
And yet, though level, earns a worthier crown,
For knowledge is a steep which few may climb;
But duty is a path which all may tread.—Lewis Morris.

Let it make no difference to thee whether thou art cold or warm if thou art doing thy duty, and whether thou art drowsy or satisfied with sleep, and whether ill-spoken of or praised.—Marcus Aurelius.

Be not diverted from your duty by any idle reflections the silly world may make on you; for their censures are not in your power, and consequently should be no part of your concern.—Epictetus.

Internally and Externally It Is Good.—The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pains in the chest, colic and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

Provides Unique Service

New Yorkers Can Park Their Goldfish At Loew's Theatre

Loew's Lexington Theatre provides an unusual service for New York people. When you go out of town, you can leave your goldfish at Loew's Lexington. There is a huge goldfish pool in the lobby and you simply walk in and dump them into it. The quaint custom was started in 1923, when a gentleman who lives in the East Sixties stopped in, with his fish under his arm, and asked Mr. Crawford, manager of the theatre, if he could leave them there. Mr. Crawford said he could, and the news of this convenient service spread. Every now and then a car drives up and a chauffeur with a goldfish bowl gets out and empties it into the pool. People never come back to claim their pets, because of course they couldn't tell which ones were theirs, and nobody wants anybody else's goldfish. They buy new ones. The system keeps the pool well populated.

Minard's Liniment gives quick relief.

Canoeists' Paradise

Within the Prince Albert National park lie three important bodies of water, as well as some forty or fifty smaller lakes. These large lakes are so closely connected by waterways that one may paddle for days in this lovely region which has been called "the prairies' wonderland."

Why We Sell Only GOODYEARS

IT is true that all tires are not alike. And it's obvious that all tires are not the same value. That's why we sell Goodyears only.

We've watched Goodyear Tires in use for a good many years. We're satisfied that they give longest mileage. We're sold on Supertwist and the All-Weather Tread. And Goodyear gives us a complete line of tires to meet all needs.

It's true we don't make quite as much money per tire. But we sell a lot more tires.

We have your size and type.

TENDERS FOR REPAIRS

Sealed Tenders will be received by the undersigned up to noon on the 1st day of August for the re-decorating of the Garrett School house. The work is specified as that of putting plaster-board on the ceiling, kalsomining the inside walls and staining all wood-work.

The lowest or any tender not necessarily accepted.

For further particulars apply to
GORDON CADMAN,
Secretary
Box 143, Carbon.

TENDERS WANTED

Sealed Tenders will be received by the undersigned up to noon on Saturday, July 26th, for the scraping, smoothing and painting the floor of the Berkley School house No. 3124, S. W. Sec. 3-29-24, with. The paint will be furnished.

All tenders to be sent to
T. CARDWELL, Secretary,
Granger, Alta.

like a forest fire.

Employer: "Late again smith."

Clerk: I'm sorry, sir, but last night my wife presented me with a boy."

Employer: "She'd have done better to have presented you with an alarm clock."

Clerk: "I rather fancy she has, sir."

Two tramps walking along the railroad found a bottle of high-powered moonshine. One took a drink and passed it to the other. And so forth, until the bottle was empty.

After a while one puffed out his chest and said: "You know Bill, tomorrow I'm going to buy all the railroads in the country, all the automobiles, all the steamboats, all the hotels—everything. What do you think of that?"

Bill looked at his companion disparagingly and replied: "Impossible; Can't do it."

"Why not?"

"I won't sell."

ALBERTA GOVERNMENT CROP REPORT

The high temperature of the past few days has been most welcome in the Northern and Western parts of the Province; the moisture supply is abundant. Crops in this area have made excellent growth, but continued cool weather in June has tended to retard progress toward maturity.

The Central Eastern area may be described as patchy. In some parts the recovery has been remarkable, due to frequent showers. At other points, less favored, recovery is only partial. On the whole the crop outlook continues to show improvement.

Along the line of the Calgary Macleod Railway there is promise of a normal crop. Eastward and farther south crops have suffered from the drought the past fortnight. Rain-fall at various points over this area, in the past few days have brought a measure of relief and a more optimistic outlook. About 20 per cent of wheat

is in head and the remainder in the shot blade.

Hail damage has occurred at several points in the Province, but the areas involved are not large. Coarse grains are making favorable progress. Hay-making is general throughout the Province,

the crop being reported slightly below average on account of the cold dry spring.

Sugar beets are reported to be a good stand and developing normally. Pastures are good and livestock making excellent gains.

SEND GARLAND BACK TO OTTAWA

GARLAND has given honest, consistent service as Member of Parliament for Bow River Constituency for 9 years.

GARLAND has voted "for the people" on every issue that has been presented to the Federal House.

GARLAND has followed a true course, unswayed by mercenary interest or offers of preferment by the Government.

GARLAND has championed the cause of Agriculture persistently and successfully in Parliament and out of it. Agriculture is a basic industry upon which depends the prosperity of the farmers, the villagers, the towns and the cities. He has loyally served them all.

GARLAND has worked effectively for the welfare of Bow River, Alberta and the Dominion of Canada.

Nine years of Active service have ripened Garland's natural ability to a high degree of efficiency and maturity of judgement. Why take a chance?

BOW RIVER CONSTITUENCY

"Canadian Markets for the Canadian Farmer"

And Aid in The Recovery of Foreign Markets

During the last ten years Canada's exports of livestock have decreased by 65%.

In the year ended March 1930 we imported:

42,000,000 pounds of butter and

41,000,000 pounds of meat.

In 1920 we exported to England 220,000,000 pounds of pork.

During the Nine Months ended March 1930 we only exported 21,000,000 pounds to the same place.

USING CANADIAN RAW MATERIAL

(By R. J. Deachman)

When Mr. Bennett gets excited—keep cool.

When he suggests that we should

use Canadian raw materials to build up Canadian industries, tell him we are.

If you are not in a hurry, you might explain to him that we are doing it now to a greater extent than we ever did, and to a much larger extent than

we could do if his policies were in force today.

Not only tell him this, but prove it—reason with him.

Here are the statistics of two years. The first in 1922.

That was the last year Conservative policies were in force.

Census figures tell us the amount of raw material and semi-manufactured products used in Canadian industries. The Trade Reports give us the imports of raw and semi-manufactured materials.

If we take the census figures showing the actual use of Canadian raw materials and deduct from the figures showing the importation of raw materials, we have then the actual consumption of Canadian raw and semi-manufactured materials in Canadian industry.

It's a simple little bit of arithmetic, anybody, even the protectionist candidate and follower of Mr. Bennett should be able to work it out. Here it is for the year 1922:

\$1,283,700,000 of raw and semi-manufactured material was used in Canadian manufacturing industries in 1922. The imports of raw and partly manufactured materials totalled \$288,300,000.

Deducting the one from the other we have the net amount of Canadian raw materials and semi-manufactured products used in Canadian industry. It amounts to \$995,400,000.

Then in 1928!

Let us test it now for the year 1928, the last in which we have the official census of industry.

\$1,950,800,000 of raw material and partly manufactured products were used in Canadian industry that year. We imported \$388,900,000 of raw material and semi-manufactured material. We used \$1,561,900,000 Canadian raw and semi-manufactured material in 1928.

In other words, Canadian industries used Canadian and semi-manufactured materials valued at \$995,400,000 in 1922 and in 1928 used raw and semi-manufactured materials valued at \$1,561,900,000—an increase in Canadian raw and semi-manufactured materials used between 1922 and 1928 of \$566,500,000 or 57 per cent more in 1928 than they did in 1922.

And 1922 was the last year in which

Conservative policies were in force.

1928 is the last year for which we have a complete census of industry.

The change has taken place under the Liberal administration of W. L. Mackenzie King.

Will Messrs. Bennett, Manion, Stevens, Cahan, Chaplin and Ryckman—and the wild-men of the Protectionist party—Messrs. McGibbon and Tommie Church vote for Mr. King at the next election.

They ought to!

They want to increase the use of

Canadian raw material in Canadian industry.

Ask your friend who tells you that we are not using Canadian raw materials, for an explanation of the figures proving that we are using 57 per cent more than in the last year of high Protectionist policies.

Find an answer to this statement if you can.

Get your answer from the defenders of the policy of exclusion. Sometime these gentlemen ought to answer. Get them to answer now!

How's Your Bank Account?

It is a common thing for parents to open a bank account for a very young child, taking care of the account until the child is old enough to manage it. Then the bank book is turned over, and Dick or Ruth shoulders a new responsibility.

In this way the child is, early in life, taught the valuable habit of thrift. Practical lessons in the keeping of accounts and records are learned. And as these small savings are conserved and mount upwards, a substantial sum of money is created which will make adequate provision for the later education of the child, or constitute a reserve of capital to start a boy in business or enable a girl to assist in establishing her own home.

Famous leaders in commerce have said that regular saving, even on a small scale, is the surest foundation for financial success. To save only five dollars a week is to build up a financial reserve, which will grow. To contract five dollars debt weekly is to accumulate a growing burden.

Nature starts each of us in life with an account at the Bank of Health, which is handled in trust by older folk, until we reach the age of responsibility for the care of the body. It makes all the difference in the world whether we handle our health account wisely or foolishly.

How is your account at the Bank of Health? Have you a good balance? Is it shrinking instead of growing? You ought to know.

Nature abhors and punishes waste while she approves and rewards thrift, both in what we call the big realm of Nature and in the individual human life.

Experts tell us that reckless and unchecked cutting and fishing threaten the existence of some of the world's largest forests and fisheries. The supplies we thought unlimited may fail. We are learning that continuance of supply depends on conservation, which is simply a bigger word for thrift.

The same is true of health. Nature exacts heavy penalties for waste. Preventive work promotes and assists the practice of health thrift.

Just as a savings account is built up by small deposits, so, too, must our health reserve be built up. Enough food and exercise, enough rest and relaxation, must be deposited in the Bank of Health every twenty-four hours.

These deposits must be in good currency, too. Nature, like our bankers, accepts no bad bills or counterfeit coins.

Why not look into this matter of your account at the Bank of Health? A wise way to begin is to go to your doctor for a complete medical examination. Don't wait until you are sick to visit your doctor; go to him when you are well and have him check you up. Take stock.

Another good plan is to repeat the process of a thorough medical examination at least once a year,—say, on your birthday anniversary. In this way any disease which may, quite unknown to you, be making insidious headway, will be discovered in its early stages, checked and cured, but which if left to develop undisturbed until you begin to "feel sick" may by then have reached the stage where it is beyond cure.

World's First Talkie Sign

Novelty Introduced At Chicago By Envelope Company

What is probably the first talking sign in the world made its debut before a crowd of over 3,000 Rotarians with a speech boosting Chicago, telling about its schools, churches, parks, playgrounds, libraries, universities, boulevards, policemen and other civic assets.

George D. Gaw of the Gaw-O'-Hara Envelope Company, is responsible for the sign, which is a 50-by-20 foot affair on the envelope company's plant in North Sacramento boulevard.

The speech was made before the microphone and amplified through the loud speaker hidden in the neon lettering but in the future records lauding the city and boosting for its "Century of Progress" will furnish voice to the sign throughout the day, according to Mr. Gaw.

Japan Building 'Planes

Army airplanes built entirely in Japan are proving highly satisfactory, according to an official report issued by the aviation department of the ministry of war. Recently two scout planes made night-flying tests in which they met every requirement of safety, speed and general airworthiness. Airplanes are now being manufactured extensively by the Kawasaki and Mitsubishi dockyards.

Lead Mines of Spain and Britain were worked more than a thousand years before Christ.

Received Information

Editor Found Out Why Manuscript Showed Damage By Fire

Adventure sometimes comes closer to you than you imagine. Recently, for example, Roy Long, editor of Cosmopolitan Magazine, opened a manila envelope mailed a few days previously in San Francisco by Peter B. Kyne, containing the manuscript of two stories. When Long drew them out, he found them slightly damaged by fire. Noticing that the envelope, also somewhat burned, bore an air mail stamp, he wired National Air Transportation for information. Soon he got this reply:

"Accident near Curwensville, Pa., Pilot Henry J. Brown, carrying 1,421 pounds mail and express, leaving Cleveland 1:10 a.m. Motor failed to pick up quickly after switching from one gas tank to the other, causing descent into clouds and fog. Pilot jumped at altitude below 1,000 feet over Clearfield mountains landing safely, but plane burned. Postal Inspector McWin, Williamsport, supervised removal of eight pounds of salvaged mail and ashes."

Trees Sometimes Get Thin

Trees, like human beings, can get thin. But their loss in bulk has passed unnoticed until recently when extremely accurate instruments for measuring their girths have been available. These measurements show what scientists name "reversible variations" especially in tree trunks. Sometimes extremely small shrinkages occur.

Four Doses Relieved Bad Attack of Cholera

Mr. W. J. Cooper, Maughan, Alta., writes:—"A year ago last spring I arrived in Canada with my family, and one of my boys, aged six, was suffering very much with cholera. When we arrived I had a few hours to wait, and told one of the attendants at the station about it, and he asked me if I had ever tried Dr. Fowler's Extract of Wild Strawberry. I had never heard of it in England, so he told me I could get it in Winnipeg. I am pleased to say I had only to give the child four doses and he got well and was quite cheerful by the next morning."

Airplane Flight To Far North

Government 'Planes To Open Up Air Route In Sub-Arctic Areas

To inspect aeroplane supply caches in the Canadian sub-Arctic and with a view to opening up aerial communication routes in the Barren Lands belt, in the Northwest Territories, a special detachment of the two government seaplanes will leave Rockcliffe Aerodrome in the near future for an air tour which may extend over 25,000 miles, most of it over a little travelled country.

Flight Lieut. F. J. Mawdesley, of the civil aviation branch of the Department of National Defence, will be in charge and will pilot one of the two 'planes. Flight Sergt. H. J. Winny will pilot the other. In addition to the two pilots there will be two mechanics, Corporal S. C. Dearway, who will be the camera operator, and C. S. McDonald, inland surveyor of the topographical surveys.

The flight will be the first official government step toward the opening up of air lanes in the North West Territories. The majority of the trip will be in the vicinity of the Mackenzie River Basin, the Great Slave Lake area and northward to Coronation Gulf. The flight will also travel over that part of Canada lying to the west of Hudson Bay north of Churchill. With only a few exceptions all the caches to be inspected will be just to the south of the Arctic circle.

The detachment will return to Ottawa before the freeze-up.

SUMMER HEAT HARD ON BABY

No season of the year is so dangerous to the life of little ones as is the summer. The excessive heat throws the little stomach out of order so quickly that unless prompt aid is at hand, the baby may be beyond all human help before the mother realizes he is ill. Summer is the season when diarrhoea, cholera infantum, dysentery and colic are most prevalent. Any of these troubles may prove deadly if not promptly treated. During the summer the mothers' best friend is Baby's Own Tablets. They regulate the bowels, sweeten the stomach and keep baby healthy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Edmonton Exhibition

Prize List Contains Regulations Regarding Surgical Treatment Of Show Animals

The Edmonton Exhibition prize list contains a regulation in the cattle section, that any animal exhibited, which has been so treated as to alter its natural conformation, will be disqualified. Competent veterinarians will examine the cattle to ensure the enforcement of this regulation. This is in line with the present wide agitation to eliminate the cutting of ties and the surgical or other treatment of show animals for show ring purposes.

After Ten Years Of Asthma Dr. J. D. Kellogg's Asthma Remedy proved the only relief for one grateful user, and this is but one case among many. Little wonder that it has now become the one recognized remedy on the market. It has earned its fame by its never failing effectiveness. It is earning it today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

A Huge Birthday Cake

One of the largest birthday cakes ever cut in London was consumed recently when the British and Foreign Bible Society celebrated its 126th birthday. The cake weighed 126 pounds—a pound for every year—and carried 126 candles. The cake was made in the design of a Chinese building.

Douglas' Egyptian Liniment, always quick, always certain. Stops bleeding instantly. Cauterizes wounds and prevents blood poisoning. Splendid for muscular rheumatism.

Voluntary Bird Census Takers

Many hundreds of persons in Canada and the United States are voluntarily assisting in the taking of a waterfowl census to determine any increase or decrease in the numbers of waterfowl that inhabit North America. This is not strictly a census, but very valuable data are being secured.

Minard's Liniment checks Colds at once.

French Evacuation Of the Rhine

Reports State That Departure Of Troops Was Somewhat Hurried

All was not so quiet and peaceful as official reports stated when the last French troops left Mainz and Wiesbaden recently, according to the Paris National organ, "La Liberte," which describes the departure under the headline of "violent incidents."

La Liberte says that, owing to hostile manifestations, booing and whistling by the crowd at the Mainz station, Gen. Guillaumat, commander-in-chief of the Rhine army, had drawn the blinds of the compartment occupied by himself and his staff. The newspaper also quotes a German newspaper story to the effect that the French troops covered the distance from their barracks to the railroad station in two minutes, whereas ten minutes was usually taken for the same march.

The Lokal Anzeiger calls it "precipitated departure."

Gen. Guillaumat himself, who arrived in Paris with the president of the inter-allied high commission, M. Tirard, declared the departure of the French troops was effected normally without any noticeable incident.

M. Tirard said: "We have given evidence of our confidence in the good faith of Germany. May it be understood and appreciated by the government and population of the Reich."

Minard's Liniment for all Strains.

After thirty-five time seems to pass so rapidly that by the time you have forgiven somebody for his Christmas present it's time to do it all over again.

Montreal An Important Port

Claims To Hold the Lead As a Grain Exporting Post

Despite the retarded grain movement in Canada in 1929, Montreal continued to hold the lead as a grain exporting port in North America, the comparison with other main ports on the continent being given in the Montreal Harbor Commissioners' annual report as follows:

Montreal	90,694,208 bus.
New York	68,895,992 "
Galveston	35,746,057 "
New Orleans	18,279,799 "
Baltimore	17,600,049 "
Philadelphia	9,419,595 "
Boston	4,104,479 "
Portland, Me.	2,427,655 "
Newport News	1,623,785 "
Mobile	1,115,659 "

Persian Balm is magical in creating alluring complexions. A little gentle rubbing and your skin is invigorated and touched with the true beauty of youth. Charming fragrance. Delightful to use. Cools and caresses the skin. Relieves all roughness and chafing caused by weather conditions. Tones and stimulates. Enhances and protects the loveliest complexion. Unrivalled as a perfect aid to beauty and charm.

Time Not Worth Much

Do you know how many feathers are on a hen's back? The winner of a recent contest to determine just that has found there are on an average of 8,120. The winner dissected a hen's skin and painstakingly numbered each feather, arriving at the above total.

Talkies in German were recently shown in Helsingfors, Finland, with some success.

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

VICEROY WOULD DEAL WITH FIRM HAND IN INDIA

Simla, India.—A fight to the finish with the civil disobedience movement was promised by the viceroy of India, Lord Irwin, in his address to the Indian legislature at Simla.

"As long as civil disobedience persists we must fight it with all our strength," Lord Irwin said. "I believe the right and best solution to the riddle of India will be found only in Britain and India joining together in the search."

Lord Irwin bitterly denounced the civil disobedience method of procedure instituted by Mahatma Gandhi, now jailed. He said it was a "deliberate attempt to coerce established authority by mass action."

"It, therefore, on account of its natural and inevitable developments, must be regarded as unconstitutional and dangerously subversive. Mass action, even if the promoters intend it to be non-violent, is nothing but the application of force under another form. And when it avowedly is intended to make government impossible, the government is bound either to resist or abdicate."

The present movement is exactly analogous to a general strike in an industrial country intended to coerce the government by mass pressure instead of argument."

In reference to the Simon commission's report on India and the proposed round table conference in London next autumn, Lord Irwin said:

"The responsibility of expressing a considered opinion has now passed to the government of India—and just as the Simon commission would have failed in its duty to parliament if it had not presented a report reflecting faithfully its own conclusions as members of the British Parliament, so the government of India would fail in its duty if, similarly, it did not approach a consideration of the commission's report with complete liberty of judgment."

Claim Of Rancher Earl Is Confirmed

Earldom Of Egmont Belongs To Alberta Man Says Judge

London, England.—Mr. Justice Eve in Chancery Division of the supreme court confirmed the claim of Frederick Trevelyan Perceval, former Alberta rancher, to the title and estates of the Earldom of Egmont.

His Lordship confirmed the decision made four weeks ago by the Master of the Chancery, P. W. Vandler, who found the claims of Robert Poinall, retired optician, and James William Perceval, baker, should be dismissed.

Mr. Justice Eve granted a declaration that the "rancher earl" was entitled to the monies in the hands of the trustees, subject to trusts of settlements, and that the trustees should make a vesting charge in favor of Perceval.

Testing Out Glider

Flight Across Atlantic May Be Attempted Later

New York.—A wireless message from the liner "Saturia" revealed that the glider "Claiborne Foster" stayed in the air for eight hours, believed to be the longest ocean flight ever made in a towed glider.

The glider, named for the Broadway actress who is sponsoring the venture, is being taken to Gibraltar for an attempted east-west flight across the ocean behind a ship. On the eastward voyage practice flights are being made by the youthful owners, Hugh Keavney and Robert Lewis.

Population Of Prince Albert

Prince Albert, Sask.—Local civic officials and members of civic boost organizations are claiming a population of 12,000 for Prince Albert, the voters' lists having shown there are 4,755 voters within the boundaries of the city. This new total is based on the contention that the number of those entitled to cast a vote is generally about one-third of the population.

W. N. U. 1846

Labor Government Escapes Defeat

Have Slim Majority On Critical Division In British House

London, England.—MacDonald Labor Government escaped defeat by the slim majority of three votes in a critical division in the House of Commons on the finance bill. It was the smallest majority in this government's career, which was sustained by eight votes two months ago on the coal mines bill and lost a vote on a minor clause of the coal bill before that.

The vote was against an amendment moved by Rt. Hon. David Lloyd George, the Liberal leader, under which profits spent upon modernization or improvements of plants or machinery would be rendered exempt from income tax.

Although it was the Liberal leader who sought the amendment which met adamant opposition from the chancellor of the exchequer, it was some of the Liberals who saved the government and further weakened the oftbroken solidarity of the Liberal party in the House. Four Liberals voted with the Labor government. They were D. Simon, of the Withington division of Manchester; Sir William Edge, Leicester; Sir Robert Hutchison and Percy A. Harris, Bethnal Green. Beside these, several Liberals, including Sir Godfrey Collins and Sir Donald McLean, abstained from voting.

Milling Qualities Excellent

Millers In Britain Are Enthusiastic Over Garnet Wheat

Ottawa, Ont.—Considerable enthusiasm was expressed among millers of Great Britain and on the continent who investigated Garnet wheat as to its milling qualities. A report by L. H. Newman, Dominion cerealist, on the result of the investigations of specially bagged shipment of this blend of wheat overseas has been made public. For a time at least Garnet should be shipped as a separate variety, instead of mixed with Manitobas. This would give the millers an opportunity of knowing the variety they were dealing with and they could treat it to the best advantage.

The Federal Department of Agriculture decided to submit Garnet to test by millers in the United Kingdom, and in different European countries. A year ago 6,700 bushels were shipped overseas to men expert in milling to obtain their opinions as to its suitability. These men were asked a series of questions, and Mr. Newman's report includes the replies they made.

Ban On U.S. Apples

Order Issued By British Government Effective Between July 7 and November 15th

Toronto, Ont.—A. M. Wiseman, British trade commissioner for Canada in Ontario, has received official information from the British government of an order just issued, prohibiting the importation of raw apples from the United States into the United Kingdom, between July 7 and November 15.

Exceptions to the ban are: in barrels, United States fancy and United States No. 1; in boxes, extra fancy and fancy. These must be accompanied by certificates signed by an authorized inspector of the United States department of agriculture.

It is learned that the embargo may be due to a fruit fly known as the "railroad borer," which is not believed to exist in England.

Had Narrow Escape

Markinch Man Left Grain Bin Just Before Wall Gave Way

Markinch, Sask.—J. E. Burke, local agent for the North Star Grain Elevator Company, narrowly escaped being buried alive here when a grain bin in the elevator, next to the one he had been cleaning, burst open, just as he had climbed out, pouring several tons of wheat into the space he had just vacated.

Had the breakage occurred but a few moments sooner, it is probable that Burke would have been hopelessly trapped in the bin, with little, if any, chance of getting out.

IN MOTOR ACCIDENT

Duke of York, who figured in a motor collision on his way to the second cricket test match at Lords. He was uninjured.

Boy Scout Jamboree

First Official Jamboree Ever Held In Canada Staged At Prince Albert National Park

Prince Albert.—First boy scout jamboree ever held in Canada was officially opened in Prince Albert National Park, with 476 scouts answering the roll-call. Situated on beautiful Lake Waskesiu, the site selected for the camp is ideal in every way. "Big Beach," nearly half a mile long, paved with clear, white sand, and curving out to Prospect Point, offers fine bathing facilities, combined with perfect safety.

Waskesiu Beach, the park headquarters and the site of the western summer home owned by Premier Mackenzie King, is a government motor camp, equipped with kitchen shelters, open fireplaces, life-saving equipment, warden's quarters, service and filling stations.

Crooks Displace Decent Men

Given Election Posts In Chicago Despite Records

Chicago, Ill.—Throwing an illuminating light upon Chicago election disorders and the ability of known crooks to get into public life, from minor positions to the state senate and the bench, a supplemental petition has been filed before County Judge Edmund V. Maguire.

The petition names 211 men and women, alleged to have police and criminal records, who have been appointed as election judges and clerks. This petition, signed by a large number of reputable voters, follows one filed last month in which 275 judges and clerks were named as having police or prison records. Men and women judges and clerks with clean records were displaced to make room for the list handed in by the political bosses, it is asserted.

The initial order for silverware for the new Waldorf-Astoria Hotel, in New York, calls for 100,000 pieces.

Would Halt Immigration

President Beatty Of the C.P.R. Would Put Check On Entries From U.S. and Europe

Toronto, Ont.—Immigration from the United States and Europe should be stopped for the time being at least, said E. W. Beatty, K.C., president of the Canadian Pacific Railway, in an interview here. Mr. Beatty would not include on the ban, however, "those British immigrants who bring their own capital and can proceed under their own steam."

"Unemployment is bad in the building trades, I think, because the usual projectors of big buildings are holding back until the wheat situation clears up. But if we have a normal crop this year and it moves out in a normal way, which it should, unless there is a permanent resistance in Europe, which I doubt, the situation in Canada should clear up," said Mr. Beatty.

Proposed Power Line

Plan To Produce Power For Saskatchewan Being Considered

Prince Albert.—A proposal by interests of eastern Canada and the United States for expenditures of \$4,500,000 on construction of a power project at what is known as "The Horseshoe Bend" on the Saskatchewan River, is under consideration of the Saskatchewan Government.

The site for the proposed harnessing of the river, which would produce power for distribution throughout the province, is 35 miles east of Prince Albert.

It was said here that the Fraser Brace Engineering Company of Montreal, and Rollins and Sons, Boston, are backing the scheme. It is considered development of northern Saskatchewan's pulpwood resources would follow completion of the project.

For Poultry Congress

Exhibits From Brandon District Now On the Way To Big Show

Brandon.—An exhibit of live poultry from the Brandon district is now on its way to the World's Poultry Congress, being held in London, England, this month.

Thirteen of the 50 birds going from Manitoba were contributed by exhibitors in the district. Mrs. Jos. Woods sent three Black Orpingtons; Jas. Clarke, three Black Wyandottes; John Windover, pair of White Chinese geese; the provincial exhibition park, a pair of Canada wild geese; Roger Morrison, a Barred Rock cock; Mrs. John Mumby, a white turkey tom, and Mrs. A. M. MacPherson, a white turkey hen. There are to be about 1,000 birds from all Canada at the show in London.

Expects Heavy Crop

Saskatoon.—Third generation Marquis wheat is standing four feet high on the farm of Henry W. Fisher, at Hague, Sask., north of here, and the heads are about four inches in length. If nothing happens to it, Fisher expects his 50-acre crop to go over 40 bushels to the acre.

TWINS TAKE LONG TRIP

June and George Hunt, two-year-old Lancashire twins, sailed recently on a six-thousand-mile trip from Liverpool to Britannia, British Columbia, on board the Canadian Pacific liner "Duchess of Atholl." George looks as though quite capable of defending sister June and faces the world with the air of one ready for all hazards. However, Canadian Pacific officials, both on the ship and the railway, smoothed the way for the tots and their trip was one long playtime to the two of them.

U. S. SENATOR SAYS TRADE WITH CANADA IS KILLED

Washington.—Senator George of Georgia, in a statement issued recently through the Democratic National Committee, assailed the administration for "strangling Canadian trade with the greediest tariff bill ever enacted." The tariff, he said, "has squeezed more than a protesting squawk out of our northern neighbor and best customer."

"Unwittingly or not it has made the Smoot-Hawley-Grundy tariff an important issue in the forthcoming general election in Canada, to which country, in 1929, we exported \$948,000,000 worth of commodities, and from which we imported the same year shipments to the sum of \$502,000,000—a trade balance of \$445,000,000 in our favor."

"Obviously the loss or the serious curtailment of our trade with the Dominion of Canada is no trifling incident. On the contrary, it presents proportions which, in time, may assume aspects that will have to be treated as an economic calamity."

"Figures compiled in the department of commerce confirm the fact that when the president approved the Smoot-Hawley-Grundy tariff act he killed the proverbial goose that lays the golden eggs with one stroke of his pen."

"It is to be regretted that efforts to promote friendly relations with our neighbors are not supported by liberal trade policies."

Investigate Butter Prices

Charge Made That Combine Exists Amongst Certain Produce Companies

Ottawa, Ont.—Charges that a combine exists amongst certain produce companies with a view to depressing the price of butter to the producers may be ventilated under the Combines Investigation Act, at least in one section of Canada, if the representations of Jean Francois Pouloit, former Liberal member of Parliament for Temiskaming, Que., are prosecuted to their ultimate stages.

In a communication to Hon. Peter Heenan, Minister of Labor, was enclosed a copy of a newspaper circulating in his constituency where in the assertion is made that the wholesale dealers "keep the market prices low when they purchase butter and accumulate it in cold storage for some time, selling it at an exorbitant price to the consumer later."

They thus deprive the farmer of his legitimate profits, says Mr. Pouloit.

The former member asked the minister to intervene under the Combines Investigation Act.

Disastrous Forest Fires

Loss In Northern Saskatchewan During Three Months \$138,929

Prince Albert, Sask.—Forest wealth of more than \$138,929 went up in smoke in the fire ravages in Northern Saskatchewan from April 1 to June 30, Dominion forestry office revealed. This figure covers only 175 of the 225 fires reported in this period, but it includes the major conflagrations.

Including the disastrous fire at Birch Bark Lake, 171,627 acres were burned over by the fires; 17,723,000 board feet salvable saw timber burned, and 3,033,000 board feet destroyed. Sixty-five thousand of the 108,338 cords of fuel and pulpwood in fire areas are salvable. Causes of the fires are summarized as follows: Settlers, 91; campers and travellers, 43; incendiary, 34; railways, 14; smokers, 6; unknown, 5; lightning, 1, and lumbering 1.

Marksman At 78

Bisley Camp, England.—Sergeant MacKay, of Scotland, is 78 years of age. He won the King's prize, classic for Empire marksmen—though it was called the Queen's prize then—back in 1883. But if anybody thinks he is losing his keen eye and steady hand he has only to point to the score card he hung up at the Bisley meet recently—six consecutive bull's eyes at 200 yards.

DUPLEX OPEN WHEEL PUMPING WINDMILL

In light winds the mill swivels easily as a weathervane. It is built especially for localities where severe wind storms predominate.

EDOUARD J. ROULEAU,
Editor and Publisher

RURAL PRESS CANNOT BE INFLUENCED

The other day a Mr. Hodgson who hails from Wetaskiwin, called in at The Chronicle office and stated that he was travelling through visiting the various newspaper men and that his occupation was in writing articles for the press. In the course of this man's talk he brought up the political question and after discerning the political attitude of the Editor, announced that the King Government would be defeated and that this would come about by a number of the old time Liberals voting for the Conservative government. This was also the case of the U.F.A. Candidates and many of the former supporters were going to vote for the Conservatives. Of course there must be a "nigger in the wood pile" for Mr. Hodgson never offered any articles to The Chronicle at this time. We cannot accuse the man of this, but we do believe that Mr. Hodgson and a few other followers are behind a movement to gain favor in the rural press in the hopes of turning the country towards the cause of the Conservatives. If such is the case we believe that our weekly newspapers are above reproach and if they favor one party or another, they do so on their own accord and no one will be able to sway the prestige of the rural editor and his publication.

Another, and probably the most important matter in which Mr. Hodgson was interviewing the weekly press was to gain the support of the weekly newspapers in favor of the anti-prohibitionists. Mr. Hodgson mentioned this and stated his case. It appears that shortly the Prohibitionists will launch a petition to be signed by the voters of Alberta for the abolition of beer parlours. It is this man's sole desire to prevent this petition from being signed by the required number of voters and he has intimated that he will write an article or articles in favor of his cause. Let us beware of these issues and we as the public press must watch our step and not be made the instrument for any one cause. If the public wants to sign a petition to abolish beer parlours it is their sole right to do so. They should, however, be aware of the consequences that may follow, and also be sure that it is the right thing to do. It may be a question of beer or bootleg and poison moonshine in a deadly curse. When the petition appears, if it does, the rural press will no doubt have some influence as to its securing the required number of signatures.

GOVERNMENT HAS DONE GOOD WORK

To hear the opponents of the King Government speak at the various political meetings being held throughout the country at the present time one would almost gather that the King Government has done very little for the country during the past four years. In fact it would seem that the country is going to the dogs and that the Liberals have not been trying to save the situation. Much of the political propaganda of the above nature has a direct relation to the crash in the stock market, the low price of wheat and many other financial conditions. But no government can be blamed for the price of wheat being so low. No government can be blamed for the unemployment in Canada today. World conditions have caused this and now it must be remedied. No government, whether it be Liberal, Conservative or

Progressive is going to put a country into a state of utter ruin. The members we send to Ottawa are usually bright, honest people, trying to do some good for the country.

We believe the Liberal policy to be the safe and sane method of government at the present time. Canada is prosperous and her trade is increasing in leaps and bounds. The King Government has promised aid to unemployment and steps have been taken in Alberta to relieve the situation immediately. The tariff reduction on many articles has lessened the cost of living during the last couple of months and the Liberal Government is responsible for this. Where high tariff is needed to protect the manufacturer, no reductions are being made, but instead the King Government has equalled the tariff of their competitive nations so that competition will be fair and to the best in-

terests of the Canadian people and manufacturers. In short, should the Liberal Government be returned to power, and we predict they will, the taxes of Canada will be lowered, the cost of living will be reduced and our manufacturers will be assured of further extensions in the world markets.

Canada was never in a more prosperous condition than she is today. During the last seven years Canada's foreign trade has been increased from \$1,501,731,341 to \$2,654,575,166. This is about 76 per cent increase in seven years. The result under Liberal administration is phenomenal; in fact no other nation in the world can equal this rapid growth of foreign trade. Why, then, should we turn out the Liberal administration, which we know has done wonders for Canada, and put in their place a government that has election promises to make, but no real proof that their policy will be advantageous to Canada?

Who Does Your Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.
